PORTICO

We took all that made the Horizon a full utility kiosk and put it all in a smaller form factor and created the Portico. The Portico kiosk has all of the versatility and accessory options of larger kiosks with a smaller footprint. Its design will compliment any environment making it ideal for your kiosk solution.

The Portico's customizable features make it a valuable addition to any location. The unit comes standard with a 15" LCD touchscreen, but can be upgraded to a 17" or 19" LCD. Other optional equipment includes:
- Rugged Keyboard
- Telephone Handset
- Card Reader
- and more (see page 2)

FutureTouch is happy to work with you to adapt any of these features or any others that will insure the satisfaction of your target user.

Additionally, to create and even more personalized feel, the Portico can be customized with multiple colors and finishes. The solid plywood base is professionally laminated to a color of your choosing to compliment your current furniture and decor.

Contact FutureTouch Technology today for a price quote and more information on the Versita Kiosk.

Keyboard with trackball option
